

PSTX - The advanced range

Introduction

Technical specifications

- Rated operational current: 30... 1250 A (inside-delta: 2160 A)
- Operational voltage: 208... 690 V AC
- Wide rated control supply voltage: 100... 250 V, 50/60 Hz

Features

- Both in-line and inside-delta connection
- Detachable keypad rated IP66 (4X outdoor)
- Graphical display with 17 languages for easy setup and operation
- Built-in bypass for energy saving and easy installation
- Analog output for measurement of current, voltage, power factor etc.

Protections

- Complete motor protection

Communication

- Built-in Modbus RTU
- Support for all major communication protocols

SECURE
MOTOR
RELIABILITY

Complete motor protection

The PSTX offers complete motor protection in only one unit and is able to handle both load and network irregularities. PT-100, earth fault protection and over/under voltage protection along with many other functions keep your motor safer than ever. PSTX also offers three types of current limit: standard, dual and ramp. This gives you full control of your motor during start. It also allows you to use your motor in weaker networks.

IMPROVE
INSTALLATION
EFFICIENCY

Built-in bypass saves time and energy

When reaching full speed, the PSTX will activate its bypass. This saves energy while reducing the softstarters heat generation. On the PSTX, the bypass is built in and verified by ABB, saving you time during installation and space in your panel.

INCREASE
APPLICATION
PRODUCTIVITY

Complete control of pumps

Time to use your processes to their full potential. The PSTX features many application enhancing features, including torque control: the most efficient way to start and stop pumps. The pump cleaning feature can reverse pump flow and clean out pipes, securing uptime of your pump system.

Heavy duty design to handle heavy applications such as centrifugal fan, mill and mixers.

Jog with slow speed forward & reverse

The slow speed forward and backward jog feature will make you more flexible when operating e.g. conveyor belts and cranes.

Torque control function the absolutely best possible stop of pumps without water hammering and pressure surges.

The HMI is user-friendly and have a clear display that saves you time and resources during both setup and operation. The detachable keypad is standard on all PSTX softstarters with IP66 and 4x outdoor for tough environments.

Coated PCB protecting from dust, moist and corrosive atmosphere.

Customize your own specific home screens (up to seven different). The PSTX has 17 pre-installed languages. You can use your customized home screens to show status information important to your process and hide information that is not.

Detachable keypad as standard. It can be placed on your panel door, meaning you do not have to interrupt your process in order to read status information or to change settings.

Easy to learn with a large graphical display along with built-in assistants make learning how to handle the PSTX fun and simple. The interface resembles other interfaces from ABB which will streamline and help with training of field personnel.

PSTX - The advanced range

Coordination examples

Normal start In-line connected

Softstarter	Technical data				Using manual motor starter or MCCB, type 1 coordination will be achieved. ¹⁾	Using gG fuses, type 1 coordination will be achieved. To achieve type 2 coordination, semiconductor fuses must be used. ²⁾	Suitable switch fuse for the recommended semiconductor fuses. ²⁾	The line contactor is not required for the softstarter itself but often used to open if OL trips ²⁾

¹⁾ These is an example of coordination. For more examples see: <https://applications.it.abb.com/SOC/Page/Selection.aspx>

²⁾ When using a softstarter in a network with high harmonic disturbances, we recommend to use a line-contactor. Please check the information in the Installation manual for more details.

Coordination tables (SOC) >

For more examples of coordination visit the online tool for coordination with short circuit protection, overload protection and line contactor.

PSTX - The advanced range

Technical data

Technical data	PSTX30... 1250
Rated insulation voltage U_i	690V
Rated operational voltage U_e	208...600 V, 208...690V +10% / -15%, 50/60Hz \pm 10%
Rated control supply voltage U_s	100...250 V +10%/-15%, 50/60Hz \pm 10%
Rated control circuit voltage U_c	Internal or external 24 V DC
Starting capacity at I_e	4 x I_e for 10 sec
Number of starts per hour	10 for PSTX30 ... PSTX370 ¹⁾ 6 for PSTX470 ... PSTX1250 ¹⁾
Overload capability	Overload class 10
Maximum altitude	4000 m (13123 ft) ³⁾
Ambient temperature	
During operation	-25...+60 °C, (-13...+140 F) ²⁾
During storage	-40...+70 °C, (-40...+158 F)
Degree of protection	
Main circuit	-
Supply and control circuit	IP20
Main circuit	
Built-in bypass contactor	Yes
Cooling system - Fan cooled	Yes (thermostat controlled)
HMI for settings (Human Machine Interface)	
Display	LCD type, graphical
Languages	Arabic, Chinese, Czech, Dutch, English, Finnish, French, German, Greek, Indonesian, Italian, Polish, Portuguese, Russian, Spanish, Swedish and Turkish
Keypad	2 selection keys, 4 navigation keys, start key, stop key, info key and remote/local key
Signal relays	
Number of programmable signal relays	3 (each relay can be programmed to None, Run, Top of ramp, Event group 0-6, Sequence 1-3 Run, Sequence 1-3 Top of ramp or Run reverse)
K4	Default as Run signal
K5	Default as Top of Ramp (Bypass) signal
K6	Default as Event group 0 (Faults)
Rated operational voltage, U_e	250 V AC/24 V DC
Rated thermal current I_{th}	5 A
Rated operational current I_e at AC-15 ($U_e=250$ V)	1.5 A
Analog output	
Output signal reference	0...10 V, 0...10 mA, 0...20 mA, 4...20 mA
Type of output signal	Motor current (A), Main voltage (V), Active power (kW), Active power (HP), Reactive power (kVar), Apparant power (kVArh), Active energy (kWh), Reactive energy (kVArh), cos phi, Motor temperature (%), Thyristor temperature (%), Motor voltage (%), Main frequency (Hz), PT100 temperature (centigrade), PTC resistance (Ohm)

Control circuit	
Number of inputs	2 (start, stop)
Number of additional programmable inputs	3 (each input can be programmed to: None, Reset, Enable, Slow speed forward (Jog), Slow speed reverse (Jog), Motor heating, Stand still brake, Start reverse, User defined protection, Emergency mode (active high), Emergency mode (active low), Fieldbus disable control, Start 1, Start 2, Start 3, Switch to remote control or Cancel brake)
Signalling indication LED	
Ready	Green
Run	Green
Fault	Red
Protection	Yellow
External keypad	
Detachable keypad	Yes
Display	LCD type, graphical
Ambient temperature	
During operation	-25...+60 °C, (-13...+140 F)
During storage	-40...+70 °C, (-40...+158 F)
Degree of protection	IP66 (Type 1, 4X, 12)
Start and stop functions	
Soft start with voltage ramp	Linear voltage ramp, suitable for most applications
Soft stop with voltage ramp	Used to prolong the stop sequence
Soft start with torque control	Linear torque ramp, the best way to start pumps
Soft stop with torque control	Commonly used to reduce water hammering in pumps
Kick start	More power in the start for heavy duty applications.
Full voltage start	0.5 second start ramp for applications with need of high starting torque
Sequence start	Start multiple motors with one softstarter
Current limit	Limits the current below a specified value
Dual current limit	Consist of a low level, a high level and a time between them
Current limit ramp	A linear increase of the current from the low to the high level
Torque limit	Limit the torque to between 20-200%
Pre-start function	Use Motor heating, Stand still brake or Jog automatically prior to start ramp
Jog with slow speed, forward and reverse	Run the motor in three different speeds, both forward and reverse
Start reverse (external contactors)	Internal logic that allows control of external contactors for reverse start
Dynamic brake	Provides a braking force to decrease stop time

¹⁾ Valid for normal start (class 10) for 50% on time and 50% off time. If other data is required, contact your local ABB office.

²⁾ Above 40 °C (104 F) up to max. 60 °C (140 F) reduce the rated current with 0,8% per °C (0,44% per F).

³⁾ When used at high altitudes, above 1000 meters (3281 ft) up to 4000 meters (13123 ft), de-rate the rated current using the following formula.
 $[\% \text{ of } I_e = 100 - \frac{x-1000}{1000}]$ x = actual altitude of the softstarter in meter, $[\% \text{ of } I_e = 100 - \frac{x-3280}{3280}]$ x = actual altitude of the softstarter in feet. For de-rating of voltage, contact your local ABB office. 150

PSTX - The advanced range

Technical data

Fieldbus connection		Warnings	
Built-in Modbus RTU	Yes, with RS485 interface on terminals 23 and 24	Current underload warning	User defined on/off
Connection for Anybus	Yes, including most common protocols, see catalog for details	Current imbalance warning	User defined on/off
Connection for ABB Fieldbus plug	Yes, compatible with a special adapter, see catalog for details	Voltage imbalance warning	User defined on/off
Protections		Thyristor overload warning (SCR)	User defined on/off
Electronic overload protection, EOL	User defined, class 10A, 10, 20, 30	Electronic overload Time-to-trip	User defined on/off
Dual overload (separate overload for start and run)	Possible to set separate overloads for start and full speed	Short circuit warning (for Limp mode)	User defined on/off, for Limp mode
PTC connection	User defined temperature control with external PTC sensor	Over voltage warning	User defined on/off
PT-100 connection	User defined temperature control with external PT-100 sensor	Under voltage warning	User defined on/off
Locked rotor protection	Prevents start if motor is stuck, e.g. stuck pumps and conveyors	Power factor underload warning	User defined on/off
Current underload protection	Stops the process if the load is too light, e.g. a pump running dry	Locked rotor warning	User defined on/off
Current imbalance protection	User defined, checks current imbalance between the phases	Faulty fan warning	User defined on/off
Power factor underload protection	User defined, trip if power factor is out of range	THD(U) - Total Harmonic Distortion warning	User defined on/off
Under voltage protection	User defined, prevents the motor from stalling in weak networks	Motor runtime limit warning	User defined on/off
Over voltage protection	User defined, prevents the motor from damage at high voltage levels	Phase loss warning (for stand by)	User defined on/off, for stand by
Voltage imbalance protection	User defined, checks voltage imbalance between the phases	EOL warning	User defined on/off
Earth fault protection / ground fault protection	User defined, 0.1-1.0 sec, stops the process if earth fault is detected	Internal faults detection	
Phase reversal protection	Prevents start if phases are connected in the wrong order	Thyristor overload	Yes
Bypass open protection	Trips if the bypass is open when it should be closed	Short circuit	Yes
User defined protection	Programmable input, can be used with external protection device	Open circuit thyristor or gate	Yes
Too long current limit protection	User defined, trips when the current has been at the current limit for too long time	Heat sink over temperature	Yes
HMI failure protection	Indicates communication failure between softstarter and HMI	Shunt fault	Yes
Fieldbus failure protection	Indicates communication failure between softstarter and PLC	PTC input	
Extension IO failure protection	Indicates communication failure between softstarter and IO module	Switch off resistance	2825 ohm ± 20%
Max number of starts/hour	Prevents start if the thyristors get too warm (thus used over specification)	Switch on resistance	1200 ohm ± 20%
Too long start time protection	User defined, trips when the starting time exceeds a set value	Other functions	
External faults detection		Real time clock	Can maintain time when the softstarter isn't powered up, 48 h back-up
Phase loss	Yes	Event log	Log of events such as trips, parameters changed and operation
High current	Yes	Emergency mode	To keep the softstarter running regardless of trip or failure. Activated via DI
Low control supply voltage	Yes	Automatic restart	In case of trip and stopped motor, the softstarter can restart itself
Faulty usage	Yes, e.g. using limp mode inside-delta	Keypad password	Lock the keypad to inhibit unauthorized motor control
Faulty connection	Yes	Pump cleaning	Can reverse pump flow and clean out pipes
Bad network quality	Yes	Electronic overload Time-to-cool	Time until the motor is ready to be restarted after an EOL trip
Vibration test		Thyristor runtime measurement	Measures most electrical variables, e.g. voltage, current and power
According to IEC 60068-2-6:2007		Auto phase sequence detection	Detection of the phase sequence
		Electricity metering	Measures most electrical variables, e.g. voltage, current and power
		Motor heating	DC injection in all windings to heat up the motor. Useful in cold or humid environment
		Stand still brake	Prevents the motor from moving, useful to keep fans from reversing
		Voltage sags detection	User defined
		Limp mode with two-phase motor control if one set of thyristors is shorted	Can keep process running until planned maintenance

For all functions and features see installation and commissioning manual, available on solutions.abb/softstarters

¹⁾ For the supply circuit 6 A delayed, for MCB use C characteristics.

²⁾ For inside delta connection the fuses shall be placed inside the delta. Contact ABB for more information.

³⁾ 170M6019 with fuse rating 1600 A should be used for 690 V version.

⁴⁾ For 690 V version, Bussmann fuses are only available for motors with rated current up to 1150 A.

Tripping curves for electronic overload protection (cold) for PSE and PSTX

Tripping curves for the integrated electronic overload protection. All units have an integrated electronic overload protection that can be set to four different tripping classes. Below you find a curve for each tripping class in cold state. These tripping curves are valid for PSTX.

²⁾ Terminal shrouds 1SFN125406R1000 can be used.

PSTX integrated bypass ratings

All ABB's softstarters are equipped with a built-in bypass contactor. This bypass contactor is rated AC-1 since it only make and break the motor in full speed at the rated current of the softstarter. However, in the PSTX470-PSTX1050 products, the bypass contactors has also a lower rated AC-3 rating which is shown in the table below.

Softstarter	PSTX470... PSTX570	PSTX720... PSTX1050	PSTX1250
Integrated contactor	AF370	AF750	AF1250
AC-3 rating at 400 V	370 A	750 A	-
IEC AC-3 Rated operational power at 400 V	200 kW	400 kW	-
UL/CSA 3-phase motor rating at 480 V	300 hp	600 hp	-

PSTX - The advanced range

Circuit diagrams

PSTX30 ... PSTX1250 In-line connected with line contactor and fuses

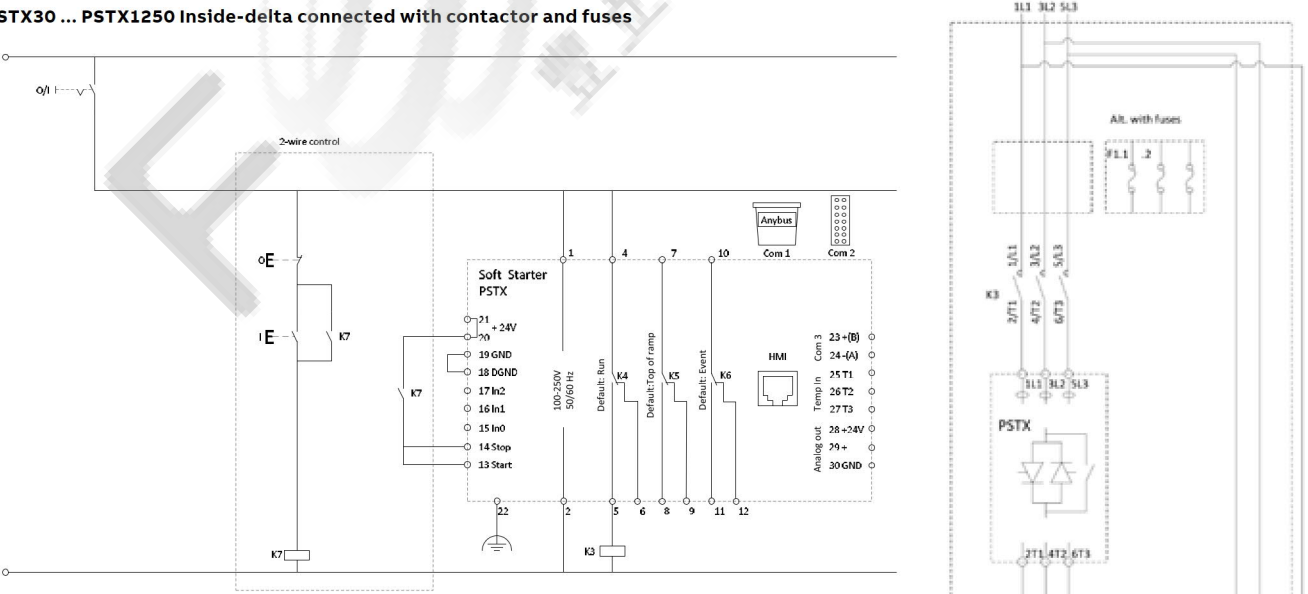

Coil consumption for main contactors.
 Pull-in max 15A
 Holding max 1.5A

If the pull-in or holding values are higher, the main contactors must be controlled via an auxiliary contactor.

PSTX30 ... PSTX1250 Inside-delta connected with contactor and fuses

Coil consumption for Inside Delta contactor.
 Pull-in max 15A
 Holding max 1,5A

If the pull-in or holding values are Higher, the Inside Delta contactor must be controlled via an auxiliary contactor.

Fieldbus communication

For softstarters

Fieldbus communication interface offering

PSR, PSE and PSTX softstarters can be connected to a fieldbus network for monitoring and control. All major industrial fieldbus protocols are covered with different accessories making the installation very flexible.

Built-in Modbus-RTU for PSTX and PSE

- Built-in Modbus RTU communication interface
- Easy to install using the Modbus RTU adaptor which is included with the Softstarter
- Through this communication interface it is possible to get full control and status information of the Softstarter as well as reading- and writing parameters

Anybus connection for PSTX

- Anybus connection accessory for communication protocol suitable for PSTX30... PSTX1250

Anybus connection accessory for communication protocol suitable for PSTX30 ...PSTX1250
